TECHNICAL SKILLS

Frontend: HTML, CSS, SASS, Bootstrap, Angular Material, Priming, JavaScript, jQuery, TypeScript, Angular.

Backend: C#, ASP.NET Core MVC, Web API, Entity Framework Core, SQL Server.

Programming Concepts: OOP, Design Patterns, Solid Principles, Unit Testing.

CLIENT-SIDE PROJECTS

- **JavaScript Project (Yummy site).**
- **JavaScript Project (Weather site).**
- **bootstrap Template (portfolio).**
- **HTML, CSS Template (fakir Template).**
- **JavaScript Project (Cruds Operations).**
- **JavaScript Project (Smart System Login).**
- **bootstrap Template (bootstrap-template).**
- **HTML, CSS Template (Bakery).**

ANGULAR PROJECTS

- **Raise Right – Educational Platform**
  Developed a comprehensive educational web application using Angular, designed to support nursery schools, teachers, school transportation services, and vendors. Features include multi-role management, class and teacher coordination, bus scheduling, and a multivendor store for educational products.
- **Tourism Services Website – Interactive Platform for Travel & Tour Bookings**
  Built a dynamic and visually appealing tourism website using Angular, showcasing travel packages, destination highlights, and company services. Implemented user-friendly navigation, responsive design, and contact features to engage customers. Enabled email-based customer inquiries and service requests for seamless communication.
- **Plato tech App Dashboard – Multi-Vendor Coach Management System**
  Designed and developed a feature-rich dashboard for Plato tech, a multi-vendor platform for fitness coaches. The system includes coach and client management, real-time chat, personalized diet and workout plans, and vendor-specific dashboards. Focused on creating a scalable UI with seamless user interaction and modular design for future expansion.
- **Angular E-commerce Application – Dual App (User & Admin)**
  Developed a full-featured e-commerce platform with separate user and admin interfaces using Angular. Integrated test APIs to simulate real-world scenarios including product browsing, cart management, order tracking (user app), and inventory/product management (admin app). Focused on improving component architecture, state management, and API integration skills.

BACK -END PROJECTS

- **DevGuide Tech – Backend System for Advisor Communication and Support**
  Developed the backend infrastructure for DevGuide Tech, a platform enabling users to connect with technical advisors. Implemented secure user authentication, advisor-client communication channels, and data handling for scheduling and support services. Focused on API development, database management, and system scalability.
